**June 2018 to April 2020**

#### Tasktop - Vancouver, Canada

- Development of specific integrations between DevOps tools for specific clients
- Improving development process into an agile environment
- Dockerizing environments for testing and demo
- Create software documentations to clients and third party customers
- Create automated tests and ensure code is well tested before committing any code changes,
- Conduct code reviews to ensure code is written according to industry and company standards and to ensure the team is using shared libraries for maximum re-use
- Participating in the interviewing process

### Java Software Engineer

**Mar 2018 to June 2018**

#### Incognito Software - Vancouver, Canada

- Requirements gathering and analysis
- Create specifications, provide estimates, and develop software for those specifications
- Create automated tests and ensure code is well tested before committing any code changes,
- Conduct code reviews to ensure code is written according to industry and company standards and to ensure the team is using shared libraries for maximum re-use

- Mentor less experienced developers and be a key role in onboarding new hires

### **Senior Software Developer**

**Mar 2015 to Mar 2018**

#### **Middleware 360 Solutions Inc. - Vancouver, Canada**

- Lead Developer & Technical Leader (team of 4)
- Software Maintenance
- Designing application together with clients
- Managing priorities to deliver value to the client
- Always helping coworkers to get through issues and leading with deadlines, delivering value to our clients making sure they're happy and satisfied with the product

### **Lead Developer & Systems Analyst Consultant**

**Feb 2013 to Nov 2014**

#### **Gtcon - São Paulo, Brazil**

- End-to-end software development for an insurance company
- Developed new features on a project basis
- Bridge between business analysis and development team
- Developed front and back end features
- Improved the internal software development process by talking to business analysts and developer to make sure we had a clear communication creating a better environment between the team and improving the tickets being delivered
